Cumulus Registration Process

The registration of your Cumulus 5 product entitles you to receive free e-mail support and product updates.

There are four possibilities to register your Cumulus 5 product:

- via www 24 hours a day
- by e-mail*
- by fax*
- by regular mail* (As the registrations are followed by an Activation Key, we recommend the other possibilities to avoid delays.)

You will find your registration card right on the bottom of the Cumulus box. Pulling out the registration card will be enable you to find the serial number for starting and registering Cumulus.

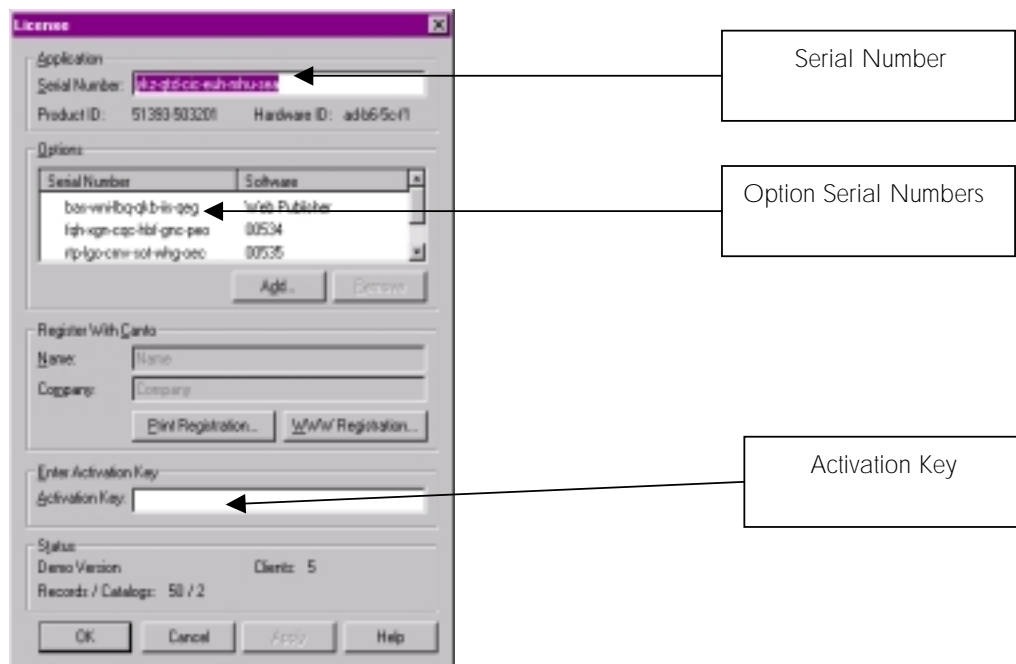

**The application Adobe Acrobat Reader or Acrobat Exchange needs to be installed on your computer, if not you will find Adobe Acrobat Reader in the Documentation folder on your Cumulus CD.*

1. After you have installed Cumulus 5, please open the License box (under Help / License, Apple / License or License in the Cumulus server settings) of the control panel. To activate optional add-ons (Vault, Browser, Web Publisher, URL AssetStore), please use the Add button.

Please note that the Option Serial Number of the Web Publisher for Single User has to be entered into the license dialog of the Web Publisher for Single User application (not into the Single User's one). The Web Publisher for Single User application has to be registered separately and will get a separate activation key.

If there is no detailed product description behind the serial number of the corresponding option in the option list field, this option has not been installed or was installed on another computer. In this case you will not see a software description (Vault, Browser, Web Publisher, URL AssetStore) but a figure combination that does not impair registration.

When registering the Cumulus server for UNIX please use the Add-License script in the installation directory and follow the on screen instructions.

2. When you have completed all entries please click on the WWW Registration button. This will open your Web Browser with the Canto registration page.

Serial number, Product ID, Serial Numbers of Options as well as the Hardware ID are automatically copied into the registration form from the License dialog. All other marked fields are to be filled.

After submitting the form an activation key will be generated and shown on the reply page. Please return to the License dialog and enter the activation key in the according field.

Please note that there are no spaces before and behind the activation key!
Click on the Apply button and your options will be activated and ready to go. Your license status will be indicated in the status field of the License dialog.
